

Do you have Phantom Limb Pain?

Participate in Shirley Ryan AbilityLab's Intuitively-controlled Virtual Reality to Treat Phantom Limb Pain study.

Participants in this study will:

- Have a 20-minute screening phone call to verify appropriateness for this study.
- Participate in 2-4 assessment and training visits (in-person or virtually) with a study team member.
- Use an at-home phantom limb pain management system with virtual reality games, for 8 weeks.
- Complete follow-up questionnaires (in-person or virtually) after 16, 24 and 32 weeks.
- Participate in this study for approximately 9 months in total (in-person or virtually).

Participants must:

Be at least 18 years old

Have an arm and/or leg amputation(s) or limb difference(s)

Be English-speaking

Have phantom limb pain

Have been on the same pain medications for at least 1 month, or not taking pain medication.
